EDUCATION

KIET Group of Institutions

B.Tech in Computer Science & Information Technology — CGPA: 8.32/10

2022 – 2026

Ghaziabad, U.P.

D.H.R.T S.V.M (CBSE)

Class XII — 91%

2021 – 2022

Ghaziabad, U.P.

EXPERIENCE

Software Developer Intern

Jan 2026 – Jun 2026

Paytm Money — One97 Communications

Noida, U.P.

- Owned end-to-end instrumentation of the analytics/CRM event layer across five core flows — **Mutual Funds, Equity, Onboarding, Portfolio, and MTF** — defining consistent event contracts that unblocked customer-journey tracking; added missing **Fund Transfer, Order Initiation, and MTF Activation** lifecycle events plus MTF upsell events on Android.
- Independently triaged and root-caused high-impact production defects in the live trading app: corrected the **NSE/BSE exchange-toggle** logic that falsely flagged dual-listed scrips as unavailable, fixed faulty duplicate-detection on **Price Alerts** that surfaced a generic error, and resolved incorrect tab/sub-tab redirects in **Fund Details** navigation.
- Diagnosed and fixed a navigation-state gap on the **Company Page** where loading and error states left users with no way back, adding back-button handling that restored a recoverable navigation flow on failed or slow API responses.
- Owned **accessibility** across trading screens, delivering WCAG-aligned screen-reader (TalkBack/VoiceOver) support; debugged Flutter **state management, navigation, and exception-handling** internals within the **pml-flutter** codebase and **Android mono-repo**, and partnered with Product, QA, and Android engineers through code reviews.

Flutter Developer Intern

Jun 2025 – Oct 2025

The APEX Solutions

Faridabad, Haryana

- Built cross-platform mobile applications in **Flutter/Dart**, integrating **REST APIs** and **Firebase** (Authentication, Firestore, real-time sync) within an Agile team using Git and GitHub.

PROJECTS

AgentOS — Coding-Agent Portfolio

GitHub Live | Python, Node.js, Rust, Next.js, K8s

2025

- Designed and built **AgentOS**, an agentic coding portfolio of **24 verified full-lifecycle tasks** across **Python, Node.js, and Rust** (Docker, Kubernetes, Terraform, GitHub Actions **CI**) backed by **85 evidence-based passing tests** — featuring **multi-agent orchestration** with an independent adversarial verifier, a polyglot fraud-scoring pipeline, and a profiled **92.7% latency reduction**; shipped a deployed **Next.js/React** platform serving each agent's verified output.

Equity SDK Developer Assistant

GitHub | Python, LangChain, LangGraph, ChromaDB

2025

- Built a local-first developer assistant answering questions over an equity-SDK documentation corpus via **RAG** (ChromaDB vector store + Ollama embeddings, cited grounding), with a generative “Ask” mode and an agentic “Do” mode on a **LangGraph** ReAct agent — tools, human-in-the-loop approval, SQLite audit log, and a golden-question **evaluation harness**.

Dairy Khata — Milk Delivery Tracker

GitHub | Flutter, SQLite, Provider, Firebase

2025

- Built a cross-platform Flutter app that digitizes daily milk-delivery tracking for dairy vendors, replacing paper ledgers with per-customer entries, month-end totals, and day-wise history; persisted data **offline-first** in **SQLite** with **Provider** state management to work without connectivity and resolve billing disputes.

TECHNICAL SKILLS

Languages: Dart, Python, JavaScript/TypeScript, Kotlin, C++, SQL

Mobile & Frontend: Flutter, Android (Mono-repo), React/Next.js, REST APIs, Accessibility (WCAG, TalkBack/VoiceOver)

Backend & Infra: FastAPI, Node.js/Express, Docker, CI/CD (GitHub Actions), PostgreSQL

Applied AI: LLMs, RAG, Vector Databases (ChromaDB), Embeddings, LangChain/LangGraph, Multi-agent Orchestration, Agent Evaluation

Testing & Architecture: Maestro (E2E), pytest, Jest, Flutter Test, Clean Architecture, State Management (Provider), Offline-first

Tools & Cloud: Git, GitHub, Postman, Android Studio, VS Code, SQLite, Firebase / Firestore, AWS (Cloud Practitioner)

ACHIEVEMENTS & LEADERSHIP

AWS Certified Cloud Practitioner (CLF-C02), 2025 | **Innotech Hackathon Finalist** (Nov 2024) — Top 9 of 120+ teams.

Youth Coordinator, ISKCON — mentored 50+ students and led community events for 500+ attendees (logistics, volunteers, scheduling).
